Hitler-Turning-into-Werewolf Nightlight

This teeth-chattering hallucinosphere will light up any baby's life. Halfway between Hitler and Werewolf, it's hard to tell if it's coming or going!

Our new "monitor" function allows the wolf's eyes to follow you or your baby around the room and emits a "safety growl" anytime someone moves toward it.

HITWLF. Wolf Hitler Light ... \$99.99.

Wrong. Don't Do It.
